

# CUSTOM-CAST COPING

## Advantages of Custom Coping

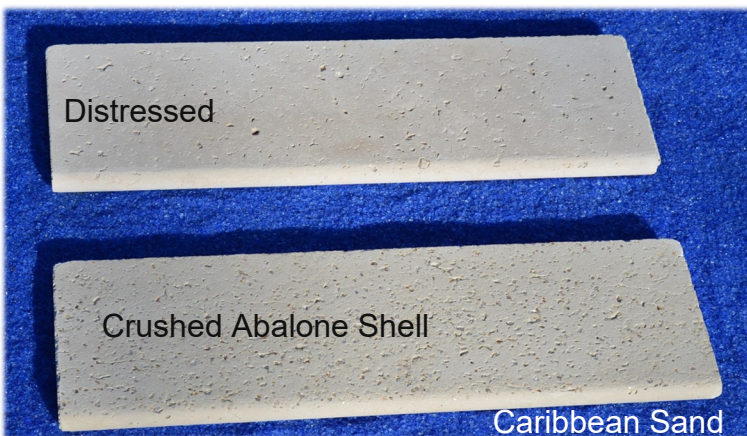

When it comes to your pool, spa and deck environments your coping can be a compelling element. We have developed a fresh new option exclusively for our customers. Our Coping Team has developed its own formula, allowing us to customize the finish for an eye catching result.

We manufacture our custom coping using a wet-cast process. This is a stronger product in comparison with other types of coping. It is more precise in its nature and creates an enduring finish. Our company controls the manufacturing process ensuring an uncompromising level of quality.

You'll enjoy a natural hand-crafted product with the choice of multiple colors featuring Crushed Abalone Shell or Distressed finishes.

*"Our new custom coping is attractive and beautiful. It is a fresh new updated look and compliments the paver deck and spa. The benefit of using The Pool Works coping is that it matches virtually any new or existing environment. We couldn't be more thrilled!"*
